

Below is a diagram of courses we offer within the Technology department at Wootton High School. We offer a variety of courses that will prepare your son or daughter for the present work force. As 8th graders we want you to focus on the courses being offered to students in the 9th grade. The graphically organized course offerings tell you how our courses articulate through a four year program at Wootton. Along with the attached flyer, we have provided you with a brochure, which describes each course offered.

All students graduating in 2012 must take foundations of technology or Introduction to Engineering as a technology credit. Due to this change, only 9th grade students will be enrolled in foundations of technology or introduction to Engineering design for the school year 2008-2009
